## Certifications

CompTIA CSAP • CompTIA CYSA+ • EC Council ECIH •  
CompTIA Security+ • Testout Ethical Hacker Pro • Testout  
Security Pro • Testout Network Pro • ISC2 Certified in  
Cybersecurity • PC Repair and Network Technician

## Skills

SentinelOne • Malware Analysis • Digital Forensics • Jira •  
Log Analysis • Incident Response • HubSpot • Virtualization  
• System Administration • Bash • Network Security • System  
Security • Python • Phishing Analysis • Google Workspace

## EXPERIENCE

### BlackCloak

Dec 2024 - Present

#### Senior Incident Responder

- Operate as an Incident Response leader managing multiple concurrent ongoing incidents ranging from SIM Swaps, Network Vulnerabilities, Account Takeovers, Social Media Takedowns, and Device Compromise.
- Operate alongside Sales as a Subject Matter Expert providing insight into client story and the organization goals, responsibility, and response.
- Lead strategy, planning, and operations with regards to security automation, efficiency, and response time. This, to further a goal of automating 90% of tasks.
- Work with Engineering and Product to identify bugs and optimize primary security offerings and major product features with sizeable impact to entire client base.
- Work cross-functionally and support teams across Client Success, Enterprise Relationship Management, Product, Internal Security, and Sales.
- Act as a mentor, teacher, and go-to resource for all members of the Security Team.

### BlackCloak

Mar 2023 - Dec 2024

#### Triage Specialist

- Assess suspicious communications (email, SMS, phone calls, etc.) to determine risk levels, providing actionable recommendations.
- Conduct in-depth malware analysis and investigations on endpoint machines in a 24/7 operated SOC environment.
- Develop custom automation for the Security Operations Center (SOC), optimizing incident response and threat detection while minimizing effective response time and manual manpower.
- Collaborate with colleague analysts to conduct penetration tests and vulnerability assessments on client networks and report findings to IT teams for remediation.
- Use current security knowledge to advise clients of trending security incidents and necessary remediation.
- Audit security reports to provide comprehensive and accurate details from endpoint detection alerts.
- Execute comprehensive security hardening on client devices, accounts, and networks.

### Home Network

Jan 2022 – Present

#### Systems and Network Administrator

- Developed and implemented infrastructure for LAN/VLAN configuration of a Type 1 Hypervisor, NAS Solution, Managed Switch, Firewall/NIDS, and configured bridged router.
- Configured publicly accessible Apache web server hosting CTF platform. Worked on and deployed, Docker Images, MySQL Databases, Amazon EC2 Instances, and SMTP Configurations.
- Continually maintain best security practices and updates based on industry regulations and unmasked Zero Day exploits.
- Maintained maximum uptime for daily accessed external nodes by utilizing load balancing techniques, redundancy measures, and good backup practices.

### Intellicomm Services

Jun 2022 – Mar 2023

#### Network Technician

- Identify and define solutions for configuration of WAN, LAN, SDWAN, and all internetwork problems.
- Survey, install, and configure network devices including but not limited to Cisco Switches, Meraki Firewalls, End User Devices, Server Storage, Access Points, IP Phones, and Security Appliances.
- Capture client feedback, site notes, and overall weekly data and document reports to field office weekly.

### Cisco Systems

Jun 2020 – Jul 2021

#### STEM Extern Program Site Leader

- Built a defining curriculum to engage and excite a cohort of 150 students in the world of STEM, Sales, and leadership.
- Spearheaded efforts in leading two locations in separate time zones to cultivate a conflict-free schedule of executives, leaders, and students.
- Developed a comprehensive presentation analyzing data of over 25 events, 30 students, and 50 survey questions to outline a curriculum for future program success and higher student enrollment.

## Accolades

- [CompTIA Partner Summit Panelist: Protecting the Future with the Future](#)
- [Security Industry Association 25 on the RISE Awardee](#)
- [Bsides Birmingham Speaker: Breaking the Entry Level Security Barrier](#)
- [Tech Is The New Black Podcast Guest: "19 Year Old Cybersecurity Prodigy!"](#)
- [Grayson Technical Education - Cybersecurity Program Board Member, Mentor, Cyberpatriot Coach](#)
- [Gwinnett Technical College - Associates of Applied Science, Computer Information Systems Mentor](#)
- [International Organization of Black Security Executives \(IOBSE\) Member](#)
